§ 21.24 [Reserved]

§ 21.25 Application for temporary authorizations.

(a) In circumstances requiring immediate or temporary use of facilities, request may be made for special temporary authority to install and/or operate new or modified equipment. Any such request may be submitted as an informal application in the manner set forth in § 21.5 and must contain full particulars as to the proposed operation including all facts sufficient to justify the temporary authority sought and the public interest therein. No such request will be considered unless the request is received by the Commission at least 10 days prior to the date of proposed construction or operation or, where an extension is sought, expiration date of the existing temporary authorization.

(b) Special temporary authorizations may be granted without regard to the 30-day public notice requirement of § 21.27(c) when:

(1) The authorization is for a period not to exceed 30 days and no application for regular application is contemplated to be filed;

(2) The authorization is for a period not to exceed 60 days pending the filing of an application for such regular operation;

(3) The authorization is to permit interim operation to facilitate completion of authorized construction or to provide substantially the same service as previously authorized; or

(4) The authorization is made upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

(c) Temporary authorization of operations not to exceed 180 days may be

granted under the standards of section 309(f) of the Communications Act where extraordinary circumstances so require. Extensions of the temporary authorization for a period of 180 days each may also be granted, but the renewal applicant bears a heavy burden to show that extraordinary circumstances warrant such an extension.

(d) In cases of emergency found by the Commission, involving danger to life or property or due to damage of equipment, or during a national emergency proclaimed by the President or declared by the Congress or during the continuance of any war in which the United States is engaged and when such action is necessary for the national defense or safety or otherwise in furtherance of the war effort, or in cases of emergency where the Commission finds that it would not be feasible to secure renewal applications from existing licensees or otherwise to follow normal licensing procedure, the Commission will grant construction permits and station licenses, or modifications or renewals thereof, during the emergency found by the Commission or during the continuance of any such national emergency or war, as special temporary licenses, only for the period of emergency or war requiring such action, without the filing of formal applications.

PROCESSING OF APPLICATIONS

§ 21.26 Receipt of applications.

Applications received by the Commission are given a file number for administrative convenience, which does not indicate the acceptance of the application for filing and processing. After preliminary review those applications covered by § 21.27(a) that appear complete will be put on public notice as accepted for filing. Neither the assignment of a file number nor the listing of the application on public notice as accepted for filing indicates that the application has been found acceptable for filing or precludes the subsequent return or dismissal of the application if

it is found to be defective or not in substantial compliance with the Commission's rules.

[52 FR 37779, Oct. 9, 1987]

§21.27 Public notice period.

(a) At regular intervals, the Commission will issue a public notice listing:

(1) The acceptance for filing of applications and major amendments thereto;

(2) Significant Commission actions concerning applications;

(3) The filing of certifications of completion of construction;

(4) The receipt of applications for minor modifications made pursuant to §21.41;

(5) Information which the Commission in its discretion believes of public significance; and

(6) Special environmental considerations as required by part 1 of this chapter.

(7) The BTAs designated for licensing through the competitive bidding process and the filing date for short-form applications for those areas;

(8) The auction winners in the competitive bidding process;

(b) A public notice will not normally be issued for any of the following applications:

(1) For authorization of a minor technical change in the facilities of a proposed or authorized station where such a change would not be classified as a major amendment to a pending application, as defined by §21.23, or as a minor modification to a license pursuant to §21.41;

(2) For temporary authorization pursuant to §21.25;

(3) For an authorization under any of the proviso clauses of section 308(a) of the Communications Act of 1934 (47 U.S.C. 308(a));

(4) For consent to an involuntary assignment or transfer of control of a radio authorization; or

(5) For consent to a voluntary assignment or transfer of control of a radio authorization, where the assignment or transfer does not involve a substantial change in ownership or control.

(c) Except as otherwise provided in this part (e.g., §21.41), no application that has appeared on public notice will be granted until the expiration of a pe-

riod of thirty days following the issuance of the public notice listing the application, or any major amendment thereto, or until the expiration of a period of thirty days following the issuance of a public notice identifying the tentative selectee of a random selection process, whichever is later.

(d) Notwithstanding any other provisions of this part, effective as of September 17, 1998, there shall be one one-week window, at such time as the Commission shall announce by public notice, for the filing of applications for high-power signal booster station, response station hub and I channels point-to-multipoint transmissions licenses, during which all applications shall be deemed to have been filed as of the same day for purposes of §§21.909, 21.913 and 74.939(l) of this chapter. Following the publication of a public notice announcing the tendering for filing of applications submitted during that window, applicants shall have a period of sixty (60) days to amend their applications, provided such amendments do not result in any increase in interference to any previously proposed or authorized station, or to facilities proposed during the window, absent consent of the applicant for or conditional licensee or licensee of the station that would receive such interference. At the conclusion of that sixty (60) day period, the Commission shall publish a public notice announcing the acceptance for filing of all applications submitted during the initial window, as amended during the sixty (60) day period. All petitions to deny such applications must be filed within sixty (60) days of such second public notice. On the sixty-first (61st) day after the publication of such second public notice, applications for new or modified response station hub, booster station and I channels point-to-multipoint transmissions licenses may be filed and will be processed in accordance with the provisions of §§21.909, 21.913 and 74.939(l) of this chapter. Notwithstanding §21.31, each application submitted during the initial window shall be granted on the sixty-first (61st) day after the Commission shall have given such public notice of its acceptance for filing, unless prior to such date either a party in interest timely files a formal petition to deny
